

3rd SOAP-Jet

Seminars on Alternatives to Petroleum - Jet

Webinar

March 21, 2014

1:00-2:00 PM EST

We will hear from:

Randy Cortright and Brice Dally of Virent about

**“Fractional Multistage Hydrothermal Liquefaction of Biomass
and Catalytic Conversion into Hydrocarbons”**

Description:

Virent will present its DOE CHASE program which focuses on its novel stage-wise hydrothermal liquefaction (HTL) of biomass process. Combined with Virent’s catalytic BioForming® platform, this technology produces high-quality renewable jet fuel and other distillate fuels from abundant lignocellulosic biomass feedstocks.
